RUSSIAN HEMP

Business project RUSSIAN HEMP was created in Russia by two Companies - leaders ropes market - Company Kona LLC and Kona Tex LLC.

These enterprises are owned factory in Volgograd and a controlling stake (51%) of Rope Factory Maikop JSC.

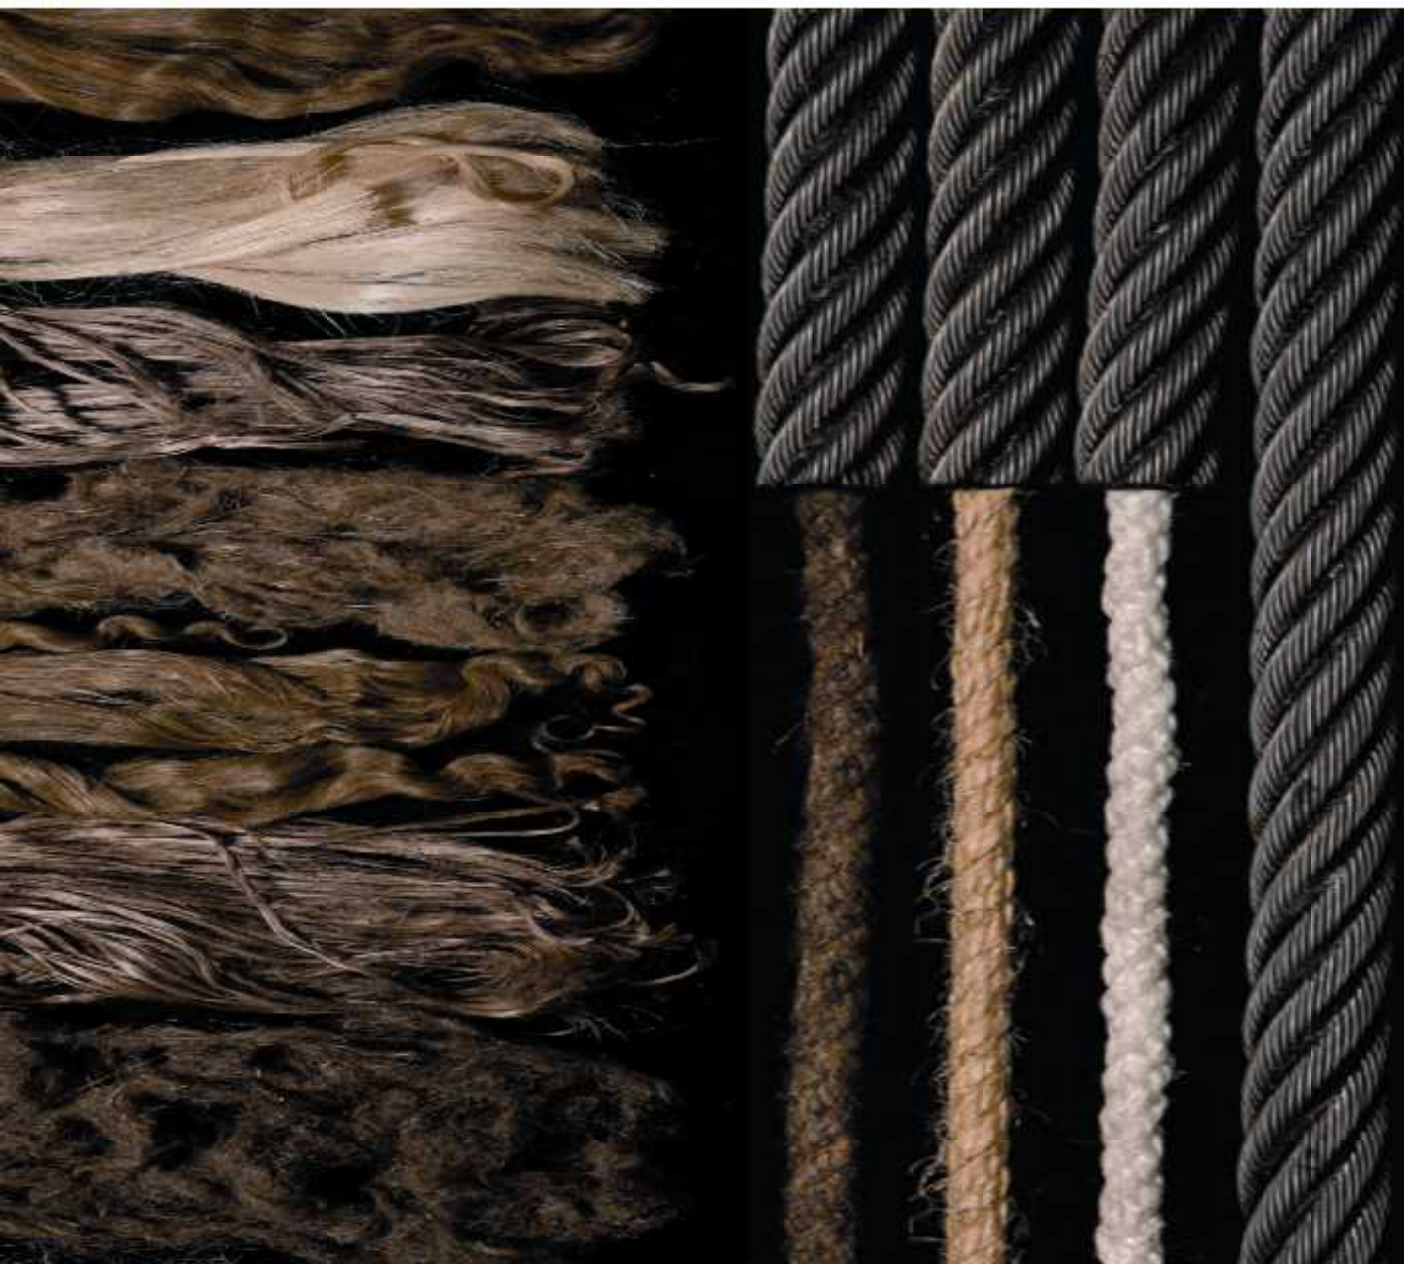

The Volgograd plant is located in territory of "Volgograd factory steel rope" (which is a part of the "Severstal" group) and produces cores for steel ropes from natural and polypropylene fibers.

Rope Factory Maikop JSC produces ropes, cables, twines, nonwoven materials from natural fibers like flax, hemp, jute, sisal.

Business project RUSSIAN HEMP was established in 2010 to supply raw material for own ropes enterprises, and other companies and exports in the future.

**Hemp areas in Russia
in 1951-1956 were about 560 000 ha**

Mordovskie penkozavody LLC, these are:

- modern factory for the primary and deep processing of hemp stalks;
 - industrial complex of cleaning and drying hemp seeds;
 - warehouses for raw with a total area of 5000 sq.m.;
 - crop rotation area about 1300 ha.
-

Equipment for processing of hemp stalks were imported from the Czech Republic in 2011 and these were units Czech, Belgian and Italian production. The production process can be seen here: http://youtu.be/E6_zb594Ybk

Mordovskie penkozavody LLC have about 1 300 ha sowing area in the Republic of Mordovia and cultivates Russian hemp varieties like "Kubanca", "Maria", "Zenica", "Surskaya". The Republic of Mordovia is the historical region where industrial hemp had been grown since 1930s without interruption 1990-2000. This heritage has allowed to find understanding with local officials and hire qualified staff.

In Russia is legal to cultivation hemp varieties which contain in dry weight of leaves and inflorescences of the upper parts of the plant no more than 0.1% THC, which is twice less than EU norms (0.2%). At present moment there are 25 varieties which are legal in Russia, some of them are legal in EU.

Part of areas Mordovskie penkozavody LLC uses for growing organic hemp (in accordance with the principles of organic agriculture - without fertilizers, pesticides, plant growth regulators). Company uses crop rotation and organic fertilizers (crop residues, green

manure) for increasing productivity, ensuring the plants mineral elements.

The products from these fields are planning to use for cosmetic and food industries (including CBD extract).

Hemp harvesting (Sep., 2014)

Harvesting is carried out by specialized hemp harvester
DEUTZ-FAHR modernized by Gotz GmbH
which at the same time cuts stalks and threshes seeds

**Pressing stalks by baler
CLAAS QUADRANT 2200 RC**

**Group of Companies "RUSSIAN HEMP»
is looking for partners and consumers hemp products
like hemp fiber, hemp hurds (sheaves), seeds, oil.**
